

BioClean Disinfectant Tablets

BioClean

by Vellex Inc.

Effective against viruses, bacteria, and fungi, including SARS-COV-2; the virus strain that causes the Novel Coronavirus.

BioClean Disinfectant Tablets are the convenient and easy way to fight C. diff and many more bacteria in just 4 minutes, including SARS-COV-2 in 10 minutes; the virus causing COVID-19. These powerful tablets utilize sodium troclosene as the active ingredient and are bleach-free. Sodium troclosene is much more stable and effective cleaner than sodium hypochlorite (bleach). Sodium troclosene releases chlorine at a much slower rate which means that BioClean Disinfectant Tablets produce a solution that maintains disinfecting power for much longer; 7 days in a sealed container, and 24 hours in an open container vs. bleach solutions that can become inactive in less than 24 hours. With a neutral pH of 6.5, BioClean Disinfectant Tablets are the perfect disinfectant for virtually any surface, including floors, in hospitals, medical offices, commercial buildings, dental offices, clinics, day care centers, nursing homes, veterinary clinics, and more.

BioClean Disinfectant is used in:

- ✦ Hospitals
- ✦ Medical and Dental Facilities
- ✦ Day cares
- ✦ Animal Life Science Labs
- ✦ Medical Research Facilities
- ✦ Operating Rooms
- ✦ Veterinary Clinics
- ✦ Retirement Homes
- ✦ Hotels
- ✦ Schools/Universities
- ✦ Sports Arenas
- ✦ Factories

BioClean Disinfectant effective against Viruses, Bacteria, & Fungi:

- ✦ SARS-COV-2 (the virus causing COVID-19)
- ✦ Norovirus
- ✦ Carbapenem resistant Klebsiella Pneumoniae
- ✦ Clostridium difficile (C. diff)
- ✦ Poliovirus type 1
- ✦ Salmonella enterica
- ✦ HIV-1
- ✦ Staphylococcus epidermidis
- ✦ Newcastle Disease Virus
- ✦ Klebsiella pneumoniae
- ✦ Canine parvovirus
- ✦ Enterococcus faecalis (Vancomycin Resistant)
- ✦ Acinetobacter baumannii
- ✦ Rhino Virus
- ✦ Hepatitis A & B Virus
- ✦ Influenza H1N1
- ✦ Herpes Simplex Virus Type 1
- ✦ Respiratory syncytial virus
- ✦ Escherichia coli O157:H7
- ✦ Pseudomonas aeruginosa
- ✦ Pseudorabies virus
- ✦ Trichophyton mentagrophytes
- ✦ Canine Distemper virus
- ✦ Staphylococcus aureus (GRSA & MRSA)
- ✦ Infectious Canine hepatitis
- ✦ And Many More...
